

## WEATHERFORD TECHNOLOGY & TRAINING CENTRE

**Location:** Abu Dhabi-UAE

DCM coordinated with Weatherford's global training management team based in Houston, US to establish the design for this very high specification training & technology centre.

The project encompasses a 130-seat auditorium, which features the largest back project system installed within the Middle East. The project also includes a real time operations centre, rig simulator, videoconference, electronics laboratory, numerous lecture theaters and training facilities. The building is equipped with fully functional restaurant and can facilitate Weatherford's regional data centre.

The facility allows Weatherford the opportunity to undertake hands on training sessions, which can be either recorder or transmitted live across the world to their staff and clients.
